

I cannot believe in this day and age the "government" thinks it has the right to tell me what to listen to! XM Satellite radio provides a huge variety of all different media, and the addition of local traffic and weather has made it the perfect all in one information and entertainment leader by far. I don't understand why "people" feel the need to prevent "us" the consumer from enjoying the best product available. If they are afraid of losing money and supporters, try offering a better product! I absolutely LOVE my XM radio! We have in both of our vehicles and our house. Those of you who oppose it should give it a try and you will change your mind. Please don't use your "power" to take away my right to choose what I use! Keep local traffic and weather, and KEEP XM!
